THE MOORS VALLEY CHALLENGE MTBO EVENT

Welcome to this Wimborne Orienteers event which is at the start of Bike Week for 2010 and we must thank ***Travelchoice*** for their support and encouragement in putting on the event.

Please register at The Go Ape shelter by taking the attached form with you duly completed with all your details. Start times are 10.00 to 12.00 and the cost is seniors £6 Juniors £4 (£1 reduction for BMBO members).

Once you have registered and have a dibber then you will need to follow the forest track as noted on the Moors Valley map (from a previous event) you will be given, to the top end of Moors Valley and then cross the busy B3081 Verwood road into Ringwood Forest North. A crossing patrol marshal will be on hand to see you across safely. The start and finish are just 400 metres along the forest road which will be signed. The total distance from Moors Valley to the start/finish area is 2K and should take no more than 15 minutes at the most. A good chance to warm up! There are no toilet facilities at the start/finish so please use the facilities at Moors Valley before you leave.

At the start you will receive a map of Ringwood Forest North which has 25 controls marked on it. The challenge is to visit all 25 controls in any order as fast as you can. However there is no requirement to visit all 25 if you do not want to – you may visit as many as you wish. The maximum time allowed for the course is 2 hours. ***Once you have completed the course please return to Moors Valley to download.***

The map is A4 and waterproof and as there is no legend on the map should require these details then a separate sheet is available to you. Please note the emergency telephone number on the bottom of the map should you be in difficulty and need assistance.

If you have not competed in a Mountain Bike Orienteering event before then help and assistance will be available at the start.

WIM EOD REGISTRATION FORM

1 Please complete this form as fully as possible
2 Take completed form to Registration
3 Take completed form and dibber to computer Input.

Car Registration
