Caddihoe Chase 2006

Bovington Ranges

16th & 17th September 2006

DAY 1**ORGANISER'S COMMENTS**

Building up to the Caddihoe I was quite concerned I wasn't quite organised enough. My responsibilities were fairly minimal thanks for David Bland who was overall co-ordinator and ensured everything was in place. However I had to organise the teams for Wessex. Many of the usual helpers were unavoidably detained from assisting, but thankfully members already doing one job offered to help in other ways and we had several volunteers from Wimborne, all eager to ensure we had a successful event. On the day my fears were proven to be wrong, we had plenty of people assisting and on several occasions had people surplus to requirement!

Many thanks have to go to the volunteers, new as well as experienced. As usual, there are always people ready at hand to give advice and make my job a whole lot easier. Without these experienced people who know what they're doing and take up tasks without having to be asked, the event would not have been such a success. I also try to give new club members responsibilities so that they can feel part of the gang and feel as if they are contributing something back to the club - hopefully they appreciate helping as much as I appreciate their assistance!

Both days 1 and 2 showed good working relationships between Wessex and Wimborne and apart from a glitch with the computers on day 2, we could not have asked for a smoother event. Even the drizzling rain on Sunday was nice and cooling after the bright sun in the morning!

There are so many people that I would like to thank that I cannot list them for fear of missing someone off. However special thanks has to go to Cris Tween who did an excellent job with the entries, preparing the dibbers for hire, organising the registration according to how many maps were left and working in the download tent. Also to David Bland as co-ordinator and Roger Crickmore (mentored by Charlie Morton) for his first attempt at planning a large event and providing excellent courses.

Well done to all.
Sian Barber

PLANNER'S COMMENTS

Planning an event at Bovington North presents a number of specific challenges, not least the formidable barbed wire fence surrounding the central area and needing permission from both the Army and the Marines for each planning trip.

The area is not the most difficult to navigate over so trying to achieve courses of the highest technical difficulty was a challenge. The start/finish were on the edge of the most technical area so to make life more interesting it was decided put both the first and last controls of all the TD5 courses in this area.

As a first time planner I was helped by both the Controller John Warren (WIM) and Bill Brown (WSX) who took on the task of producing all the maps and control description sheets. On a number of occasions one or other (or both) would gently remind me that there were certain tasks that would soon be needing my attention. Many thanks to both of them.

Roger Crickmore(WSX)

CONTROLLER'S COMMENTS

Firstly, I want to thank the whole of the Wessex team for presenting a very smooth event, particularly in that they used the 'semi - open' start system to absorb the inevitable Saturday morning traffic problems. It seemed to put everyone in a relaxed frame of mind before they ran. Bovington North is now a difficult area in which to plan. The MOD have recently installed new barbed wire fences and insisted that we only use their designated crossing points. The terrain is in many places very tough and although the recent rain has laid the dust there are still significant marshes to avoid. These issues, together with restrictions on access, added to the planning challenge of producing courses that met the required technical standard, and also accounts for the high number of controls and convoluted shapes on the longer courses. For Roger Crickmore this was his first attempt at planning an event on this scale and I was greatly impressed with his enthusiasm and attention to detail in meeting what was a major challenge. Congratulations Roger!

John Warren (WIM)

#####

DAY 2

ORGANISER'S COMMENTS

"Thanks to everyone who contributed towards making what, I feel, was a successful week-end. It was very much a combined effort by the two clubs and particular thanks to the Planners, Controllers and the Army and Marines for allowing us access to the Training Area not only on the days but to allow for the necessary planning etc.. Special thanks also to the backroom team manning the computers especially Cris Tween who handled entries and carried out numerous other tasks behind the scenes.

David Bland

PLANNERS' COMMENTS

Planning the second day of the Caddihoe Chase on the Southern Tank Ranges at Bovington was always going to present us with some problems! The whole area is very physical and this is especially true of the open areas. Sadly there is very little nice runnable white woodland. The churned-up sand in the tank exercise areas can change from the consistency of concrete in dry weather to something akin to rice pudding after even the slightest rain! The vegetation in the rough open really is that - ROUGH - and often conceals gullies, pits, furrows and even tank traps. But, having completed your runs, you now know that, even if you didn't before... We were constrained by limited options for start and finish positions and needing to create suitable, appropriate courses for the younger juniors. Apologies for the uphill finish - we always grumble about "sadistic planners who give us uphill finishes", but, again, we had little option. The next challenge for us was the number of roads and tracks and a relatively small total area. A good area in the SW of the map, across the public road, was too far to get to except for the 4 longest courses.

We hope that you "enjoyed" the particular navigational challenges that we set you and that you could overlook the effects of the tough terrain. Rest assured we did try to keep you out of the worst of the areas..... but if you went off the optimal route, you probably found some of them.....!

To those of you, particularly on course 4, visiting control 549, who gave voice to some complaints about difficulty in accurately reading the vegetation classification in the area of the control, we accept some of your comments. However, we feel there were more than enough other

features all along the route that should have guided your navigation accurately into the control, and rung warning bells when you headed, some way off course, into woodland! We have, however, learnt from it.

Winning times overall seem to have been about right, if a little short, but as it was the second day on rather tough terrain, we certainly didn't hear any complaints about that! We were pleased to see so many of you competing over the 2 days and hope you will all enter again at next year's Caddihoe.

A big thank you to Richard for his helpful, meticulous, but discreet controlling. Special mention should be made of the fact that not only did he "final control" all 84 controls on Saturday but also volunteered for an early start on Sunday morning to dib-check one of the sectors. Hope you had the chance to put your feet up and recover on Monday!!

Big thanks to Chris, Lynn & Simon Branford, Richard Brightman, Karen French, Mike Furlong, John Shucksmith, Cathy & Dave Warne for collecting controls at the end, just when it had started to rain. Final thanks to Maggie Dunn for an early start and soggy feet on Sunday morning, helping us check controls.

John & Di Tilsley (WIM)

CONTROLLERS COMMENTS

With two experienced planners I really had little to do except checking, I didn't need to lay a hand on the courses. Nothing was vandalised or even just moved; well what would you expect in a secure military training area! The WIM team were very well organised and handled the complexities of the chasing start very well indeed.

We had one single mention of a control box going a bit quiet, but many mentions of the area around control 549, a spur. This was in an area mapped as 'rough open scattered trees' which can be misinterpreted as either 'rough open' or 'run' as you approach the area. Those that were looking for a bit of forest were confused, and had to sort things out by relocating, mostly from a nearby stream. Strangely enough no one complained about 542, a large depression, located in the same area.

Thank you all for coming and giving us such a good turnout. – that really does make it all so worth while from the organizer's point of view; and I do mean the whole organising team.

Richard Arman, WSX.
